

When you make a mistake, it means that you have a chance to learn something new.

I like to hear about other peoples' successes because it inspires me.

Intelligence may be partly inherited, but it is also influenced strongly by the environment.

If you have to work hard, then you're not very smart.

When you make a mistake, it means you're just not good at what you were trying.

It's best to do things you know you know how to do.

You can actually get more intelligent over time.

You can't really change how intelligent you are.

I haven't mastered this idea YET.

I didn't make the basketball team so I am going to keep practicing and try again next year.

When my teacher points out a mistake, it means they think I can do better.

I compare my score to those of my friends, and if theirs are higher, I feel bad

No one in my family is good at science, so that means I won't be either.

I'm always being judged and evaluated, and I have to try to appear smart

It's best to take risks and challenge yourself, even if you're not sure you can do it.

I really want to learn to play an instrument, but I think it will be too hard for me.
